Vegetation:	Sedum, herbs, grasses, trees
Architect/Designer:	-
Contractor:	Heijmans Sport en Groen

“De Zilvervloot”

In a very early stage the contractor was involved in this project together with ZinCo Benelux, to make this project to the success it is now. On a renovation site in the city of Dordrecht a very explicit building was planned with commercial spaces on the first two floors and residential spaces on top of that. On the very different roof levels were green roofs made: from the extensive green roofs on the twelfth floor till the big shared intensive green roof on the 3rd floor. As a real landmark two trees were planted on the sixth floor on top of a corner of the building.

ZinCo Benelux is a supplier and adviser of ZinCo Green Roof Systems in Belgium, Luxembourg and the Netherlands. The ZinCo Green Roof Systems provide clients with complete system build-ups for every type of Green Roof. The product range

includes: extensive Green Roofs with rockery type plants, flourishing roof gardens as well as Green Roofs in combination with walkways and driveways.
