Contractor:	Gartenhof Küsters GmbH, Neuss

"Siemens AG"

The flat roof of the Siemens canteen is visible from the pedestrian bridge which connects their office buildings across the Völklinger Straße, as well as the company shop "Für-uns-Shop" among other office buildings. In order to provide a pleasant view for the company's staff and visitors, the flat roof area was eventually landscaped using the "Rockery Type Plants" green roof system.

Passing by on the pedestrian bridge, both visitors and employees can now enjoy a 600 sqm stretch of natural area featuring *Thymus serpyllum* and *Sedum sexangulare* plants.
