“V&D”

Only a few meters a way from the project “The Klanderij” this green roof is made on an existing roof of a department store. On the roof of this department store were two layers of apartments realised in a square with a green roof in the middle. Because it was an existing building it was very important that the green roof construction was as light as possible. The trees are therefore placed in bins on top of the constructions columns.

ZinCo Benelux is a supplier and adviser of ZinCo Green Roof Systems in Belgium, Luxembourg and the Netherlands. The ZinCo Green Roof Systems provide clients with complete system build-ups for every type of Green Roof. The product range includes: extensive Green Roofs with rockery type plants, flourishing roof gardens as well as Green Roofs in combination with walkways and driveways.
