Contractor:	Yi Fong Construction Pte Ltd.

“Subaru Showroom”

This project is the first drive-through roof garden to be built in Singapore. The garden is designed with 3 landscape zones complete with theme areas and special effects. Great emphasis was placed on the design of a sustainable roof garden that entails the careful selection and installation of inorganic and plant material, as well as the subsequent safety of users of the garden.

Highlights of the garden include static Subaru car displays, a rocky outcrop with waterfall, rainforest garden, grassland area, desert garden and mountain garden. Roof visitors are encouraged to drive through the garden and enjoy the unique experience.
